

Empower Hong Kong Intelligent Central Warehouse for Cross-border Commerce and Trade

Those enterprises engaged in cross-border commerce and trade can obtain one-stop cross-border supply solutions for global overseas warehouses through JUSDA's smart central warehouse service in Hong Kong. We provide overseas market analysis, sales forecast, warehouse transportation and distribution management and other services with smart technology, allowing you to keep abreast of market dynamics and strategies.

Intelligent Central Warehouse Overview

We have built two central warehouses in Hong Kong, covering an area of 11,000 square meters, which can provide more than 33,000 square meters of operating space. One-stop services such as B2C packaging, express delivery, postal service, small package line and customs clearance are available for small and medium-sized goods, including cosmetics, daily necessities, etc. The operation capacity of the center can reach 30,000-50,000 orders per day. In case of promotional activities, it can be arranged for 24 hours, and the peak value can exceed 100,000 orders.

Global Network

As JUSDA has a strong global network which connects the Americas, Europe, Japan, Korea, Southeast Asia, India, Vietnam and Africa with its Hong Kong center, we are confident of satisfying your cross-border needs and helping you expand your business into the global market. At present, we have started to serve well-known e-commerce companies such as Globalegrow E-commerce, eBay, Little Red Book, and Amazon.

Smart Application

Market Data Analysis

JUSDA's cutting-edge technologies in AI, Big Data and IoT not only enable you to master warehousing and logistics information, but also provide you with upstream and downstream data analysis of production and sales and information updates of market competition, so that you can visualize the entire supply chain from your PC or mobile phone.

Comprehensive Three-dimensional Cross-border Services

We are building an ecological system of cross-border comprehensive services. With the leading strength in customs affairs and cross-border commerce and trade of JUSDA, we have connected with e-commerce giants such as Amazon, eBay and other platforms to form a fully three-dimensional and comprehensive service solution from manufacturing to distribution of commerce and trade, from Chinese manufacturing to overseas sales network layout.

Warehouse Automation

350 sets of AGV racks have been installed in our central warehouse, and the efficiency of each workstation is about 300-500 pieces per hour. In addition, it is equipped with a continuous automatic assembly line more than 120 meters long, which connects picking, recheck and packing. The use of AGV allows picking and sorting of goods to achieve the corresponding capacity with only about 30% of the original manpower.
